25/10/2019

- Created whatsapp group to discuss meetings and have others catch up if they couldn't turn up
- First meeting
- Met everyone and tutor
- Briefly discussed placements

01/11/2019

- Spoke on jobs and gave ourselves targets on how many placements we want to apply for

15/11/2019

- Made a discord server to discuss project ideas, everyone is more active on there than whatsapp
- Spoke about jobs and how applications are going
- More on project ideas
- Setup a google drive

22/11/2019

- Spoke about our application idea

When we meet (set to change): Fridays 3 till 4 in the library

Brainstorm for group project ideas:

- Travel guide
- Weather report
- Shopping list/checklist
  - Digital list that encourages limited phone usage time, so user can quickly read/write/delete within seconds so they can get back to what they were doing originally
- Personal assistant (?)
- Job application data gatherer
  - Gathers information for the user to see what skills are required for the role, so they can learn them
  - API from online
- Total subscription
  - Money manager (focus on easy of use and quickness)
- Website-ready for mobile applications

- Time zones for international companies

  - Could have all of these ideas as included in one app

- Project planner:

  - Sets deadlines for overall project along with sub deadlines/milestones for requirements and contextual deadlines

  - Business orientated

26/11/2019	Spoke on jobs and checked progress on placements
20/01/2020	Spoke on jobs and checked progress on placements Planned how to start and handle the creation of the application
04/02/2020	Started on application development and informed others of their progress if they had any
25/02/2020	I spoke about the finished development of the account creation Spoke about the overall progress of the application's development
10/03/2020	Spoke about everyone's progress and helped out other members' tasks if they required assistance
